Education

May 2022

Masters of Computer Science | Idaho State University

- 4.0 GPA, *Phi Kappa Phi*
- Thesis: *Imposing Structure on Generated Sequences: Constrained Hidden Markov Processes*
- Graduate Teaching Assistantship Grant 2020-2022
- Outstanding Graduate Student 2021-2022
- Related coursework: Computational Theory, Software Testing, Empirical Software Engineering, Advanced Algorithms, Machine Learning, Compilers, Operating Systems, Systems Analysis and Design

Dec 2019

Bachelor of Computer Science | Idaho State University

- Graduated *cum laude* with a minor in *Mathematics*

Experience

Fall 2019 - May 2022

Research and Teaching Assistant | Idaho State University

Research and teaching assistant to Dr. Paul Bodily for multiple courses including: *Computational Theory* and *Machine Learning*. Tutored for upper-division and graduate level courses.

Sept 2016 - Oct 2019

IT Student Supervisor | Idaho State University

Supervised and trained IT Support Technicians at ISU and retained an in-depth knowledge of Windows and MacOS to support users across the entire campus.

Projects *(hosted on GitHub)*

Constrained Hidden Markov Model *(Master's Thesis)*

Written in *Rust* with high test coverage. Performance is *10x* over a previous python implementation. *Generated musical sequences* styled after Bach's Chorales. Generated music compared favorably against an Anticipation-RNN (neural network) in an *IRB-approved survey*.

Mnemonic Device Generator using Markov chains

C++ multi-threaded program generating mnemonic devices and communicating through IPC to a *Django* server that serves a frontend. Presented this project at ICCC's 2019 conference in North Carolina.
